DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Figure 3 should be identified as Figures 3A, 3B-1, 3B-2, 3B-3 and 3B-4 in the brief description of the drawing and detailed description of the preferred embodiment.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claims 14 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14, line 6 "second circuit ... a **second fixed** DC voltage" since Applicant has not claimed a first fixed DC voltage, a second fixed DC voltage can't be claimed.

Claim 16 depends upon claim 14, recites a "second predetermined DC voltage" while claim recites " a second fixed DC output voltage".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 14-29 and 37-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen (6,297,972).

Chen discloses a backup power stage associated with a dual input power supply and method of operating the same in Figs. 1 and 2. A first circuit converting an AC voltage to a first predetermined DC output voltage 120/220, second circuit converting a DC input voltage to a second fixed DC output voltage 140/240 and a third circuit receiving said first and second predetermined DC voltages from the first and second circuits and generating a selectable output DC voltage 135/235. See col. 5, lines 15-52.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 14-29 and 37-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,643,158. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application claim is broader than the patent claim.
